★ LAHONTAN ALFALFA ★
Certified Blue Tag. Our stocks are ready Now. Ask for prices.
Lahontan Alfalfa is a new synthetic variety, practically immune to stem nematode, highly resistant to the spotted alfalfa aphid, and is wilt resistant.
Yields are equal to Ranger where the above are not factors in production, and Lahontan yields much more than Ranger where they are factors.
Supplies are limited, since this is first year seed has been made available commercially.
(Based on information from Western College Experiment Stations.)

BE SURE TO BUY ONLY U. S. VERIFIED ORIGIN ALFALFA. LOOK FOR THE SEALED, VERIFIED TAG ON EACH BAG.

A Happy and Prosperous Year to You

and our thanks for your patronage and favors in the past. We look forward to being of service to you through the approaching season.

Recent rains and snows give hope that needed moisture throughout the drouth areas will provide good basic conditions for early seedings of legumes and grasses.

M BRAND quality was never better and we have good supplies to start off the new season. Quality seed (High purity, High germination), costs less, because of better stands, cleaner fields and greater crop production.

This is a good time for you to stock up with seeds, to be ready for your customers. The dealer with seed *on hand* is the dealer most likely to make the sale.
